

Cormorant Multi-Role UAV Applications for the Oil & Gas Industry

A group of about seven people are standing on a large, flat area covered in light-colored gravel or crushed stone. They are looking towards a small, white, rectangular building in the distance. The sky is overcast and grey. The foreground is dominated by the texture of the gravel, which is out of focus. The background shows some greenery and a utility pole on the left side.

Oil & Gas Applications:

- All weather including icing conditions
- No external rotors (safe, quiet)
- 100Km operational radius with 500 Kg payload
- Rig to shore (cargo, MedEvac)
- Security scramble, patrol, personnel rescue
- Oil spill detection / decontamination
- On rig light construction (hoisting)
