

BioConvergence

THE FUTURE OF HEALTHTECH

FEBRUARY 10-11 AND 14-16* | ZOOM

9:00-12:00 & 17:00-18:00

The global HealthTech industry is undergoing an exciting revolution, fostering a new multidisciplinary industry that is based on the synergy between different technologies from the fields of biology and engineering.

This approach, known as “BioConvergence” has been identified by the government of Israel as the country’s next growth engine, with massive investments to be made by the Israel Innovation Authority and other ministries in this field in the decade to come.

Be part of the BioConvergence revolution!
