Commission's Sustainable and Smart Mobility Strategy

The strategy outlines how the EU transport system can achieve a green and digital transformation and become more resilient to future crises. As outlined in the European Green Deal, the result will be a 90% cut in emissions by 2050, delivered by a smart, competitive, safe, accessible and affordable transport system. The document indicates that the Commission is investing heavily in research and pre-deployment testing through funding instruments such as Horizon Europe, and the Connecting Europe Facility.
