(oil-filled transformer case, coil, etc.)
Sheet Metal – Paint

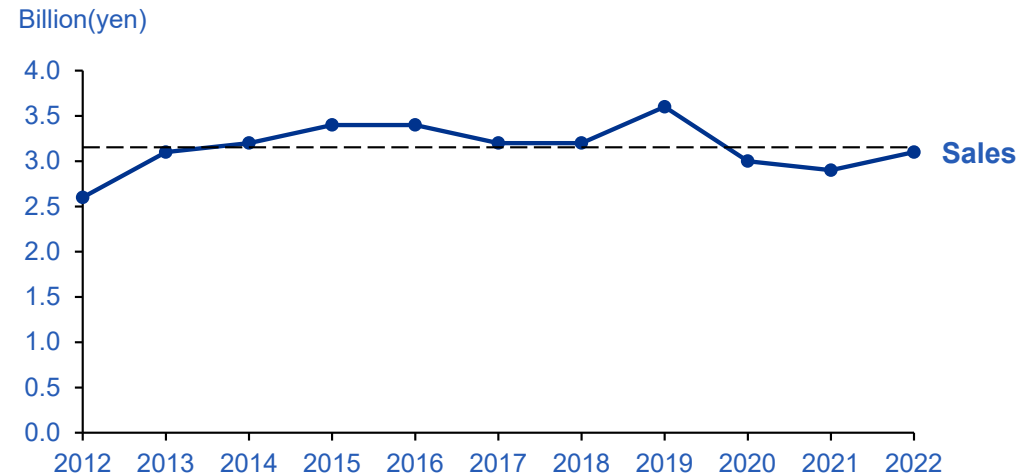

Distribution board related Manufacturing
(distribution board box, etc.)
Sheet Metal - Paint - Assembly

Market Share of Transformer in Japan (Main Business)

Sales (2012~2022)

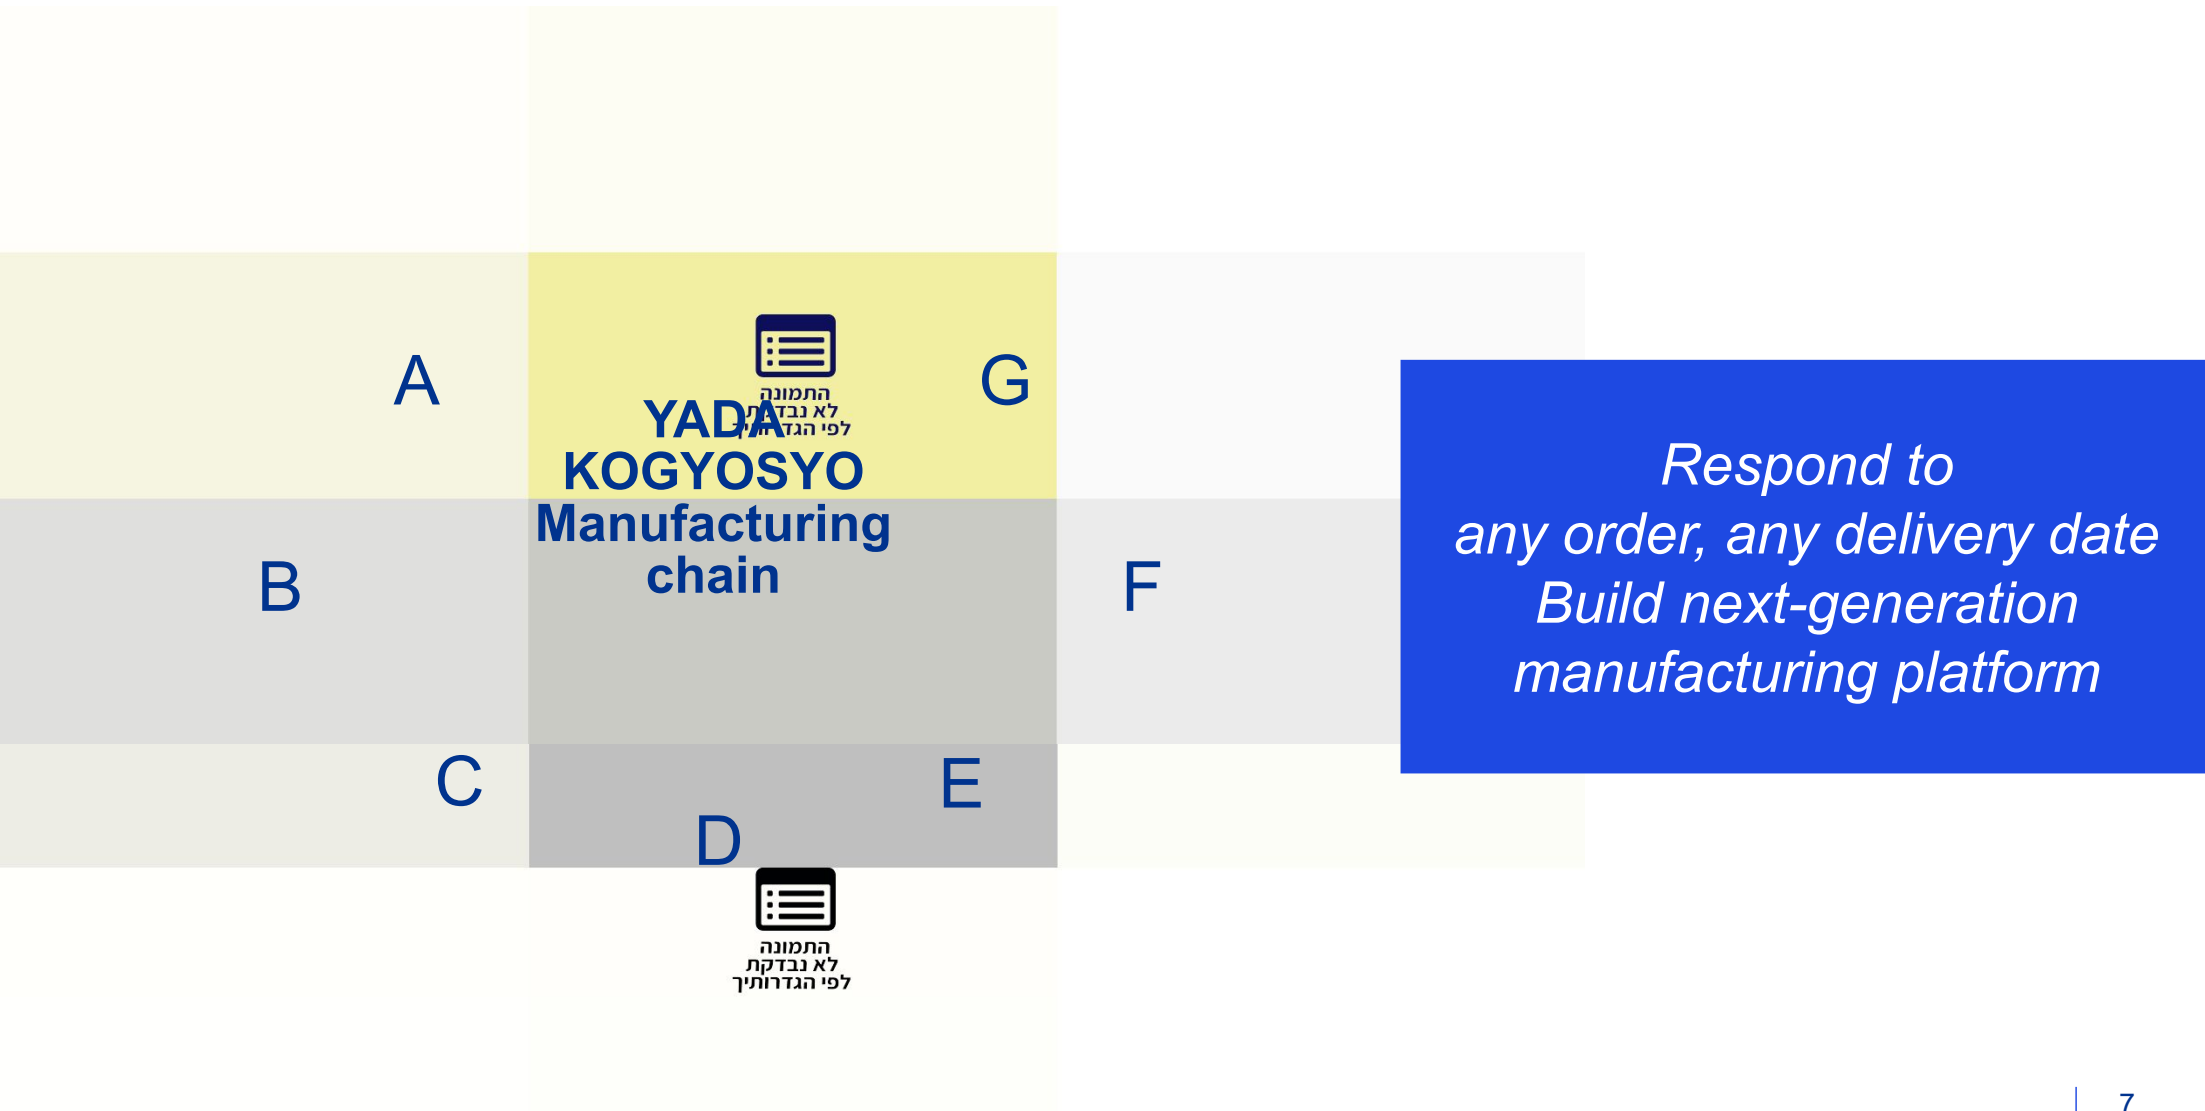

02

Main Project

Main Project

Fun Fun Fun Factory

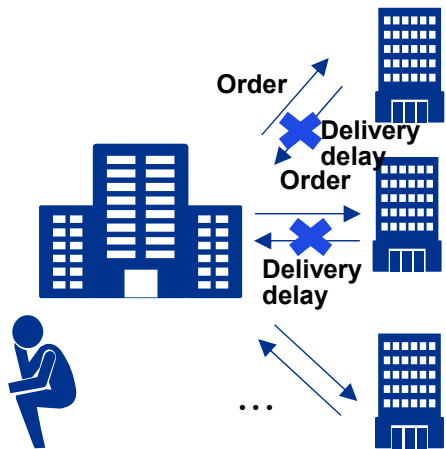

Creating a new manufacturing platform YADA3.0 - Factory chain concept

Main Project

Issues in Manufacturing industry in Japan

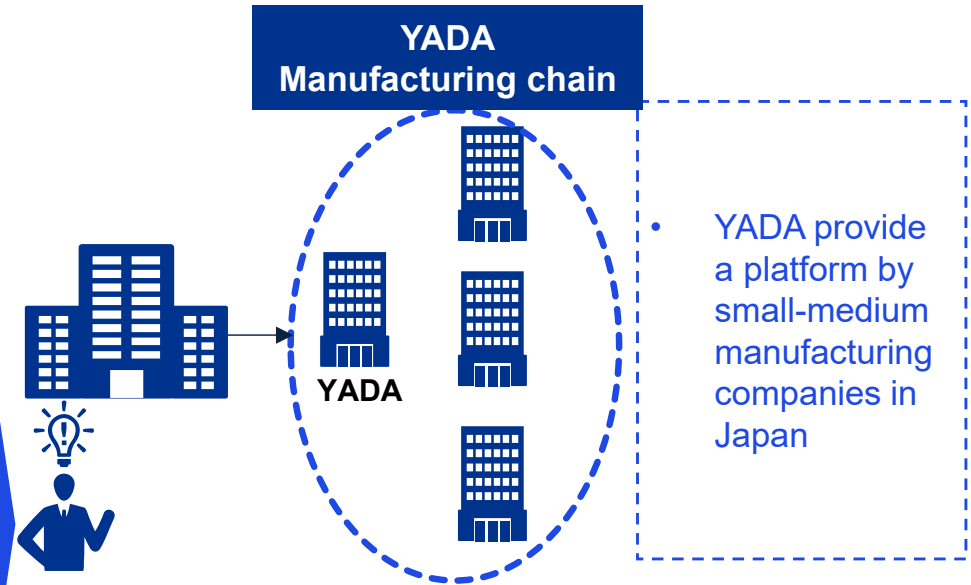

- Small-Medium Manufacturing Companies in Japan have limited manufacturing facilities
- This results in **delay in delivery and payment**

Challenges

- **Lack of capability for bulk orders**
- **Decrease in orders from the main companies in the industry**

Delays in delivery time and varied quality due to a lack of capability could lose trust, leading to main companies reducing their orders. This, in turn, could result in a decline in the industry in Japan.

YADA Solution

Key Points of the Solution

- **Networks with other manufacturers**
Sorting orders to appropriate manufacturers depending on volume/type, etc.
- **Strengthen Monitoring**
Managing manufacturing companies to assure delivery time
- **Providing a “Kaizen” (improvement) knowledge**
Establishing a “Kaizen” plan to assure quality

THANK YOU!

Looking forward to seeing you

soon...
