To whom it may concern,

Further to the Q1 report published by the Partnership on May 30, 2024, the Partnership is pleased to inform that the Shenandoah project operator has successfully completed the drilling operations of the 4th and last development well included in the field development plan, SA007, which has reached its total depth. The project operator will now install the production liner and temporarily abandon the well until completion operations will commence in this well. Then, the drillship will commence completion work in all 4 wells and their preparation for production commissioning.
