Description of the Research Team

Please insert your description here

My research team focuses on special education across the lifespan; examines the social, psychological and emotional aspects of children, adolescents, and adults with and without disabilities.

Examining inclusive educational frameworks, teachers' attitudes toward inclusion, and the gap between policy and classroom realities, teacher training.

We explore family coping and resilience when raising a child with special needs.

Aggressive behaviors, online, offline, and Problematic Internet Use (PIU), and the role of AI and assistive technology in academic success and social integration.

PROJECT IDEA / CONTRIBUTION TO THE CALL TOPIC

Your potential role

Research

Technology Development

Dissemination

Training

Please insert your contribution to the future project here

Your contribution can be as follows:

My research contributes an integrated, lifespan-oriented understanding of special education by linking social, psychological, and emotional processes across children, adolescents, and adults with and without disabilities.

To advance inclusion research by empirically identifying gaps between inclusion policy and classroom realities, and by translating teachers' attitudes and training needs into actionable recommendations for professional development.

Examining family coping and resilience, the research deepens theoretical models of family adaptation to disability.

To address challenges such as aggressive behaviors, online and offline contexts, problematic internet use (PIU), and the educational and social implications of AI and assistive technologies in order to promote academic success, well-being, and social integration in inclusive and digital learning environments.
