

SIIRD Feasibility Study Project Proposal

Companies from Israel and Singapore considering an R&D partnership may decide to perform preliminary investigations to determine the technical feasibility or market acceptability of a new product, technology concept, and so on. This can be done as a test of the project's viability, before committing to an R&D or Strategic Sector Project, which would be of much higher cost and longer duration.

For Feasibility Study Projects, SIIRD may co-fund a maximum of USD 50,000 or 50% of the total project cost, whichever is lower. The maximum duration of such a project is 6 months.

Applications for Feasibility Study Projects are open twice a year. The exact dates will be published on the [SIIRD website](#) and on IIA's and EnterpriseSG's websites respectively.
